

Seminar Series

EnviroSpec Seminar Series

Product Intelligence for Green Building Outcomes

EnviroSpec is partnering with the New Zealand Green Building Council for this Seminar Series and will integrate with the nationwide training, updates and launch event of Homestar V4.

Join us for this morning session to gain a complete update on Green Building Frameworks and Product Updates.

This is a 1.5 – 2 hour training session and update on product environmental certification requirements and their related compliance pathways into Green Building Rating programmes. It will include a mix of presentations from Product Suppliers and EnviroSpec and will be structured to identify:

- What are the overall life-cycle environmental impacts that must be considered when choosing this type of product.
- What is the best available on the market today for each product category.
- What are the specific environmental certification requirements for each product category, whether you are working on a Homestar, Green Star NZ or other green rating project.

Click on the event below to view agenda + Register to attend
Or email EnviroSpec direct at contact@envirospec.co.nz to book your place,
(please include your Name, Company and email address)

Auckland
25th July

Wellington
1st August

Christchurch
9th August

The EnviroSpec Seminar is designed to run in conjunction with the New Zealand Green Building Council’s Design, Define, Incentivise events which are followed by the launch event of the new Homestar version 4 tool.

Attendance is FREE for all events and you are invited to participate in all, making this a complete package of industry updates and training to ensure you stay abreast of the latest news in this space. Both events are taking place in the same venues to ensure ease of access and to facilitate your attendance throughout the day.

MORNING	EnviroSpec Product and Materials morning seminar (Arrival & registration)
PRODUCT INTELLIGENCE FOR GREEN BUILDING OUTCOMES	
Update on product environmental certification requirements and their related compliance pathways into Green Building Rating programmes.	
Join EnviroSpec Director Alex Reiche, alongside selected leading product suppliers to gain an insight into the life cycle considerations for these type of products, the best solutions available today and the specific environmental certification compliance when working on a Homestar or Green Star NZ project.	

Lunch break – Lunch not provided, delegates may break from the conference venue for lunch at a local café or restaurant
